Re: Endorsement of the proposed paved Black Butte Trail

I am writing on behalf of Shibui Spa in Sisters Oregon to endorse support of the *Sisters to Black Butte* paved trail. The trail will promote overall health and is parallel to our mission to lead our clients to Wellness. Any addition to our community to encourage a healthy lifestyle is something that should seriously be considered.

Access to the trail through local neighborhoods will increase families to choose physically using the trail to get places instead of using their automobiles. This benefits the human body as well as the air we breathe.

Pedestrians will be offered the benefit of an easily accessible solid surface to walk through the forest that will be easier to navigate decreasing injury from a possible fall. This will also allow access to disabled persons and smaller family members.

Locals and tourist together will enjoy the scenic path winding through the forest adding "Peace of Mind" to the list of overall health benefits.

Enhancing the current trail will only grant access to those that hesitated in the past. Please consider this request.

Sincerely,

Kendra Littrell

Spa Director
